#### Client

Atomic Pest Control

If "Atomic Bug" wasn't a B-side to George Clinton's legendary dance-floor filler, "Atomic Dog," it should have been ("buzz buzz buzz yippee yo yippee yay" would be a catchy chorus). Bluemedica developed the custom graphics using Adobe's Photoshop® and Illustrator®, and output the system on its Mimaki JV-3 solvent-ink printer using 3M™'s Controllac film with Comply® embossed adhesive. The shop protected this honey of a graphic with 3M's 8519 luster-finish overlamine.
